

December 7th ----- continued

and second years in which the University was in operation, and also this term up to the present date : -

Academic year 1884 & 5	Junior Preparatory	18	
	Senior "	<u>10</u>	28
" " 1885 & 6	Junior "	26	
	Senior "	14	
	Freshman "	<u>8</u>	48
" " 1886 & 7 to Dec. 1/86	Junior "	15	
	Senior "	21	
	Freshman "	16	
	Sophomore "	<u>6</u>	58

Besides the 58 students enrolled a considerable number have made known their intention to attend the University exercises during the present year. Those in attendance at present belong to Traill, Pembina, Walsh, Grand Forks, Cass, Miner, Benson and other counties of Dakota, with a few from Minnesota and Iowa. Attention may here be called to the fact that, with the same number of instructors (five) as were upon the teaching staff in the session of 1884 and 5, instruction is now given to about twice as many classes and in studies which are much more advanced. Regarding the building itself I may state, at no time since the University was first opened has it been in better condition than at present. The recitation, lecture, museum and other rooms are clean, convenient and healthful. The University reading room is supplied with the leading daily and weekly newspapers published in Dakota, and with the North American Review, the Century, Atlantic Monthly, Popular Science Monthly, Harpers Monthly and other journals. The Library has been somewhat increased during the past summer, and this department of the University, together with the reading room and museums, have already proved exceedingly useful to students and instructors. Very respectfully submitted (signed) Henry Montgomery, Acting President. Report of Professor of Natural Science. To the Regents of the University of North Dakota. Gentlemen: In obedience to the 24<sup>th</sup> section of your By-Laws I hereby make brief report of the classes and studies in the Natural Science Department. During the present University term there have been eight classes in my charge in the subjects Physiology, Botany, Zoology, Chemistry and Mineralogy. Three of these classes belong to the Sophomore year, two classes belong to the Freshman Year, two to
