

and breaking the sheathing.

The ornamental coping on the top of the front wall was blown off, carrying with it four or five courses of the brick work and this falling mass somewhat injured the stone steps and coping of the front approaches. We have put a force of men at work, removing the rubbish and closing up the apertures, to protect [sic] the building against further damage from the weather and [unreadable] estimates of the probable cost of repairing the building to submit the same to you for instructions as to our future action in the matter. Very Respectfully. W.N. Roach. Pres, and further reported that the Governor did not feel justified in authorizing the removal of the University without Legislat[-]ive Sanction as it would establish a dangerous precedent but that he would approve the repairing of the building and recommend that the University be reimbursed for any reasonable expenditure incurred therefore [sic].

Mr Twamley moved that we proceed to make the necessary repairs on the Building and grounds, including fence and trees and that a suitable loan for said purpose be made from the Banks, not exceeding ten thousand dollars at interest not exceeding ten per cent and that all work be let by contract where practicable.

Which motion prevailed.

The Secretary was instructed to wire B.W. Fish Architect to come at once examine the building, prepare plans and specifications for repairing the building and that bids for doing the work be submitted at the next meeting for consideration by the Board.
